ISSUES OF

SUGAR REPORTS

READY REFERENCE GUIDE TO DATA IN 1948-52 ISSUES OF SUGAR REPORTIntroduction

Since May 1948, a publication, Sugar Reports has been issued from time to time, by the Sugar Branch, Production and Marketing Administration, U. S. Department of Agriculture. The purpose of such reports is to provide information relative to the production and marketing of sugar and related products for use by PMA field offices, the Sugar Industry and other interested parties and at times to set forth data on questions of current interest pertaining to problems before the Sugar Branch.

The first issue was released in May 1948, and the most recent issue in December 1952. In 1948 there were two issues; in 1949, four; in 1950, five; in 1951, five; and in 1952, there were five issues. One of the 1950 (9M), one of the 1951 (12M), and two of the 1952 (16M and 17M) issues, relate to molasses only, and carry the same report numbers as the issues on sugar with the letter "M" added. The number of Sugar Reports issued since 1948 totals 21.

At times, the same type of information, with the exception of the period of coverage, appears in two or more issues of the Sugar Reports. At other times special items of importance appear in one issue only. This ready reference guide is designed to furnish a readily available "Catalogue" of items which have appeared in various issues. In cases where the same data have appeared in more than one issue except as to revisions or additions, only the most recent appearance of such data is catalogued herein. In general, the years shown relate to calendar years; unless otherwise indicated.

This reference guide is arranged alphabetically by subject-matter and cross-indexed where need appears to warrant. The Sugar Reports number and the page numbers thereof are indicated. Charts are indicated by an asterisk (*) after a page number or group of page numbers. As Sugar Reports No. 11 is divided into four sections, the sections in that issue are indicated by placing the section number after the Reports number, thus Section 4 of the Sugar Reports No. 11 is indicated as 11/4.
